## The San Juan River

### Trophy Trout Year Round

Located in the north-west corner of New Mexico, the San Juan River is world renowned for providing some of the most rewarding trout fishing you will ever experience. The San Juan is a consistent producer of both rainbows and browns averaging 16 to 18 inches, with many reaching much larger proportions. Recent studies have suggested that there are 15,000 fish per mile.

### Large Groups Welcome

### What makes the San Juan So Special?

Since the completion of the Navajo Dam in the early 60's, the river below the dam has provided a perfect environment for the growth of trophy sized trout. Brown trout naturally reproduce in the river and the rainbow fingerlings that are stocked yearly are essentially wild by the time they reach maturity. Catching them is an experience you will never forget!

The San Juan has developed a far reaching reputation for Gold Medal trout fishing throughout the year. With comfortable temperatures all four seasons, you can be assured of enjoyable fishing whenever you come. The San Juan provides something for everyone, year round.

## Fisheads

### The Gold Medal Fishing Experience

Our fly fishing guides know the San Juan and how to fly fish it. If you are an experienced angler, we will our expertise to help you find the kind of fishing you are looking for. For the novice, we will help you hone your skills and catch the fish you've only dreamed of. Even if you're a first timer, we'll teach you everything you need to know to catch beautiful San Juan trout!

No matter what your age or level of experience, we'll show you a great time.

### What To Wear

Clothing should be layered so you can adapt to the widely varying temperatures. An afternoon rain shower is common in the summer. Bring a rain jacket even if the sky is cloudless in the morning.

Sun block (SPF 30+), sun gloves, hats, neck protection, polarized sunglasses and sun protective clothing are highly recommended.

*"Unreal! -- I Caught more 18" plus trout than I could count!" Jaa - MN*
